In France the principal object exciting attention is the position of hostility assumed by the Assembly towards the Ministry and the President, as is indicated by the Assembly refusing to dismiss M. Yon. of the last debate. M. Daprat, on that occasion, said, in the most positive manner, that M. Baroche had received a report, pointing out the idegality of the lottery. M. Baroche denied this in the ' Mouiteur' on the following morning, and M. Duprat repeated his statement in the opposition papers. M. Baroche then called the attention of the Assembly to the matter, and made a very lame defence. Duprat still repeated his statement, and at last it was said, that there was no 'report' but only a 'letter' in the bureau of the Minister, answering to the description of M. Duprat. The Assembly showed its appreciation of this Jesuitical quibbling by passing to the order of the day by a large majority. These squabbles are very unfavourable to the passing of the new dotation, which Louis Napoleon will shortly be compelled to apply for.

12th December, 1849. Sia,—I beg to inform you that for nearly five years I hardly knew what it was to have a day's health, suffering from extreme weakness and debility, with constant ner-vous headaches, giddiness, and sickness of the stomach. together with a great depression of spirits. I used to think that nothing could benefit me, as I had been to many medical men, some of whom, after doing all that was in their power, informed me, that they considered that I had some spinal complaint beyond the reach of cure, together with a very disordered state of the stomach and liver, making my case so complicated that nothing could be done for me. One day, being unusually ill and in a dejected state, I saw your pills advertised, and resolved to give them a trial, more perhaps with curiosity than with a hope of being cured, however I so a found myself better by taking them, and so I went on persevering in their use for six months, when I am happy to say they effected a perfect cure.—(Signed) William Smith, (frequently called Edward.)—To

WHO MADE THE POOR?

Who made the poor? Not He whose throne is heaven. God: by whom earth was given,

And all that therein is, seed, herb, and tree;

And fowl that eleave the air, and fish that swim the

sea, that range the field to man for food; Not God the great and good, Whose bounty's scattered o'er The earth like grain on garner'd floor-He did not make the poor! But God made man. Who bade the planets roll, And formed the wond'rous plan That girds the eternal pole Of Heaven, with world's illuming space: ile who to each assigned a place, Gave man a reasoning soul and bade him stand on this terrestrial ball sibline in his own form—erect, and lord of all. Some traitors to their kind.

Whose tongues almost persuade
That night were day—have bent their mind God gave them, to degrade Their equals lower than the brute. And threaten those who dare dispute Their power, with dungeon gloom; Yet, like a spirit from the tomb. The voice of Nature rises still, And while one good man lingers here. Yet as it hath, it ever will; And they who dread it shall revere The sound of its eternal truth, As in the earliness of youth Ere Avarice lured the soul astray. Or mad Ambition led the way Through paths, whose ruggedness i n To domes that never sheltered Peace.

Man hath been taught to bow

To Cunning's traitorous sway; But 'tis not as it hath been. Now Behold the sturdy toiler's brow-There beams a calmer ray Of purer intellectual fire, Than lit the aspect of his sire; A prouder glance that seems to say, The worse, our mental bounds are riven And soon shall dawn the glorious day, We shall resume the gifts of Heaven." VIC. GALLERY. On a good attractive night, the rush of costers to the threepenny gallery of the Coburg (better known as "the Vic") is peculiar and almost awful. The long zig-zag staircase that leads to the pay-

We need scarcely say that Mr. W. Lacy received a warm and cheering welcome. His Wildrake is a highly inteligent and humorous embodiment of the quaint ancy of Sheridan Knowles's muse. The sheepish shyness and the love-taught cunning are artistically blended, not forced into violent contrast. The great scene, where he frightens Constance out of coquetry, by announcing his intended marriage, was a striking instance of this artistic intelligence. Mr. Lacy is not an actor content to raise a vulgar laugh at the expense of the consistency of the character he is for the time embodying. Of Mrs. Nisbett's Neighbour Constance what can we say that has not been said a thousand times by a thousand admirers? It is one of the richest, raciest, and most buoyant outbursts of unforced, flowing humour of which our stage can boast. Who that has ever heard her joyous, ringing laugh, as she chuckles over her tormented cousin but feels the same sensation of springing pleasure as when list he was under its magical influence? "FIAT JUSTITIA,"

"If it were possible for the working classes, by combining among themselves, to raise, or keep up the general rate of wages, it need hardly be said that this would be a thing not to be punished, but to be welcomed and rejoiced at."

ATMART MILL. STUART MILL.

The extraordinary termination of the dispute between the engine drivers of the northern division of the great North Western railway and their wealthy and powerful employers, is suggestive of the most earnest and serious reflection of that important body of operatives, and of the working classes generally. Never was there a victory, by employers, more signal or perfect. Never was there a powerful body of men, locally organised in considerable strength, so completely unprepared to cope with their giant antagonists. Never was there a more perfect ab- derstood, for six months, to have twenty-five shilsence of anything like fixed principles of action, or of an organised executive, armed with discretionary powers to deal with so simple, and, after all, scarcely important question.

Here are the Railway Boards of Great Britain, the proprietors of the highways of the country, they have, as such, immense powers, and immense responsibilities. The public have a deep interest first eight that were imported. There are, howwell-being of all classes. He then showed how that the operations of railways should be conducted with steadiness and punctuality; and we telligence and sincerity of the working classes, and declared his opinion that they only needed to have a free and cheap literature to rise still higher in the social scale of society.

Mr. P. Boswick seconded the resolution in an interval of the social scale of society.

No doubt Perry had been put up to this by Me sieurs—the gentlemen interpreters. He then took them to first-rate houses (?) and treated them with the best of everything. They, poor fellows, believed that all he had told them was true, and they came away with him, with light hearts, to the Wolverhampton tin diggins. HEALTH OF LONDON DURING THE WEEK .- The return for the week ending last Saturday shows that 1,196 deaths were registered in the metropolitan districts; in the first three weeks of December they were 1,001, 1,000, and 1,166. This increase is considerable, and must be attributable in part to the character of the weather, which has been unfavourable to the public health; but, as in the previous week, it is also due to some coroners' returns, which were not completed, as regards registration, when the inquests in mistake." were held, but have been accumulating till the end of the quarter. In the ten corresponding weeks of the years 1810 9, the returns varied from 910 deaths in 1845, at a period of rather higher than the average temperature, to 1,403 in 1848, when scarlating and typhus were rife, and cholera had begun, these epidemics have succeeded to the influenza of the termer years. Amongst children, however, ho ping cough, diarrhess, and small-pox appear on the increase. The deaths from the first of these complaints were 61, from diarilæs (principally amongst infants) 31; white 25 children and 5 adults died of small-pox. This disease still presses severely in Lisson Grove, where it was again faral in seven cases between the 20th and 25th of December. Only one of the sufferers. six girls and a boy, had apparently been vaccinated. With reference to a death from small-pox, without vaccination, which occurred to a bey in High-street, Shadwell, Vr. Ross observes that "four other children are suffering from the same complaint in the family; the father refuses to give his c-ildren the protection of the cow-pox, and such is the result; but the mischief does not end here, for the deadly poison is di-seminated through the neighbourhold." Another death from small-pox without vaccination, is recaded by the same registrar in a house at Elm-row, Shadwell, and here also "four other children are suffering under small-pox, the father entertaining objections to vaccination." The registrar of Haggerstone West mentions a family at Hoxton, in which the wife, son, daughter, and servant died of scarlet fever, all within a short period. A child in Chapel-street, Woolwich, died, according to the medical certificate, of "miasmatic poisoning." The class of "diseases of the respiratory organs," comprises laryngists, bronchitis, pleurisy, pneumonia, asil ma, and other diseases of return 204 deaths, which is more than the average. From bronchitis there were 129, from pneumonia 90; the former showing an increase on the previous week. the latter a decrease. Three deaths are ascribed to privation of food or clothing, 11 amongst children to want of breast mick, 2 to neglect, and 2 to incomperance. The death of a girl, aged 7 years, is reported by the medical attendant as caused by "hydropericardium - fright produced by a boy wearing a mask." PROSPECTS OF IMPROVEMENT. - The Christmas season has afforded a pretty accurate mode of testing the condition of the people, and of comparing the purchases of nocessaries and luxuries with those of the preceding four years of unexampled suffering and depression. Doubtless a great deal of distress still prevails, which is fully shared with the humbler classes by the encumbered landed proprietors and many of their creditors; but it now appears to be admitted upon all hands, that the condition of the bulk of the town population is gradually and steadily improving. The Cork Reporter has an exceedingly gratifying statement of the symptoms of reviving prosperity exhibited at the Christmas markets, mercial and manufacturing town, which had suffered

past a spirit of insubordination has been apparent n some districts of the counties of Armagh and Donegal, and it is stated that the Ribbon system prevails to a considerable extent amongst the peasantry. On the application of the local magistrates, the government have proclaimed several electoral divisions of Donegal under the Crime and Outrage Act, and an increased police force has been placed in those districts. In one of the most re-mote parts of that county, the wild and mountainous region of Grosedore, where Lord George Hill has effected really wonderful improvements, at an expenditure of about £25,000, symptoms of agrarian disturbance have recently been manifested, and there has been some opposition to the payment of rents. He maintained that that oath did not bind Catholic members to abstain from dealing with tho revenues of the Protestant chuach. He also remarked that the subject of Catholic education was one with respect to which the Roman Catholic members ought to be agreed before they went over to Parliament. At the meeting of those members, to take place in January next, he (Mr. O'Connell) would himself propose that point, and the one as to the Catholic oath should be taken into consi-

Would it be believed, he said, that the Sisters of Charity, too, had been made the object of ribald representation in the streets of English against the Rev. P. J. O'Leary, chaplain of the new towns. The Rev. Mr. Gilligan next addressed the meeting, and warned Lord John Russel not to make penal laws against Catholic religious liberty. He said he did not advocate warfare in a physical point of view, but he would remind the noble lord that out of the 150,000 of the British army, fully 50,000 were good fighting Catholics. He would also remind him that there were 6,000,000 of Catholics crushed to gratify the paliry trickery of Lord John Russell. ENCUMBERED ESTATES SALE.—The estate of Mr. Richard Ashe, of Ashegrove, in the county of Cork, was sold on Tuesday, in the city of Cork, pursuant to the order of the commissioners. The attendance was most respectable, and the competition very spirited. The sale of the property did not occupy half-an-hour, and the sum realised by the whole was £7,936; about £900 over what was bid in Dublin. MURDER IN TIPPERARY .- The Tipperary Vindica-

tor contains the following account of a barbarous murder committed in that county on Sunday :- "A frightful murder was perpetrated at Tyone, near Nenagh, on the night of Sunday. The murdered man was caretaker in the employment of Mr. F. Byron, and was much esteemed by that gentleman. The head of this poor victim of barbarity was towards Jane Wilbred. almost severed from the body. An inquest has been held by T. T. Abbott, Esq., and a verdict of 'Wilful Murder against some person or persons unknown' has been returned."

TENANT-RIGHT IN ULSTER .- The Newry Telegraph contains a long statement in defence of the management of the estates of the Earl of Caledon from certain charges made by one of the journals of the Tenant League. It would appear from this state-ment that the market value of tenant-right (which had been most seriously reduced, and, in some cases, extirpated by the potato failures and the depreciation of agricultural products,) is again recovering. The Newry Telegraph states that "the tenant-right of fifty-five acres, Irish measure, on the Caledon estates, was recently sold for £500, and that of ten acres for £100." It is added that the sum of £150 was offered within the last week for the tenant-right of another farm on the same estate, for which not more than £50 could have been obtained some time since. The conduct of Lord Caledon as a landlord is highly praised. It is mentioned that from £60 to £70 are paid weekly as wages to his labourers, and there are upon the estate mills for grinding flour, scutching flax, &c., for the special accommodation of the farmers.

Borough Gaol, which possesses an interest beyond this neighbourhood.

The case before the Court of Borough Sessions this morning was one in which Robert Burgess and Wm. Hewitt were charged with stealing, on the 27th of November last, a piece of wrappering, value 5s. The when compared with the corresponding quarter of jury had some difficulty in agreeing upon their verdict, but after leaving the court for about ten minutes in Ireland, who would not permit themselves to be they found Hewitt guilty, and Burgess not guilty. On returning to court with these verdicts, Mr. J. Pollock (counsel for the prisoners) rose and addressed the bench (on which were Mr. R. B. Armstrong, the recorder, and Mr. D. Maule, stipendiary magistrate), to the following effect:—I think it right to make a statement at this stage of these pro-

ceedings with reference to Burgess, who has just been acquitted, which I do solely in the discharge of a public duty, but which I confess I rise to make with great regret. I say with regret, because it reflects upon the character of a reverend gentleman whom I know personally, and a gentleman for whom I have great respect-I mean the chaplain of the Borough Gaol. The facts were communicated to me through the prisoner's attorney in the first place, and since then by the prisoner himself; and are to the effect that he (the prisoner) has been urged by the chaplain In the City af Dablin the new constituency will not to plead guilty to this charge. THE QUARTER'S REVENUE.

There is every reason to expect that the quarter's revenue will show a very trifling decrease—if anylast year, notwithstanding the reductions which the Chancellor of the Exchequer was able to make in the last session. The brick duties-£700,000 a year-were wholly abandoned, and yet we find the excise so prosperous, in the other items, as scarcely to miss the total loss in this. The buoyancy of the revenue of excise is one of the most convincing and conclusive proofs of the wide-spread prosperity and occupation of the great mass of the people. The stamps, although greatly reduced, will not exhibit the signs of that reduction in full in the present quarter, since a great increase of business, which was kept back for the change, will probably show its effect upon the present quarter, which to its full extent' cannot be hoped for again. The Customs fluctuate, but will show well in spite of the great reductions that have taken place. These are the chief items which mark the state of the country. The others will probably vary very little, and will be shown by the tabular returns. In the meantime the large amount of public deposits exhibited in the weekly returns of the Bank of England, amounting to the sum of nearly half a million of increase weekly, shows that the debtor and creditor account of the Chancellor of the Exchequer stands well, and that his balance at the end of the financial year is more likely to increase than to be diminished. notwithstanding the taxes that he has relaxed or reduced, and the sums that are in course of expenditure in liquidation of the public debt .- Observer.

THE DEATHS IN MINES DURING THE LAST YEAR.

TO THE EDITOR OF THE MINING JOURNAL. Sir, -A reference to your weekly records shows that the loss of life in mines continues without much diminution. The following statement is extracted from your journal :-

Killed by explosions 172 ... 255 ... 256 Killed by falls of the roof ... 194 ... 154 ... 163 Killed by accidents in shafts 101 ... 90 ... 70 Killed by other casualties ... 70 ... 68 ... 78 Total...... 537 ... 567 ... 567

Anticipating that your next paper will contain, at least, the average number of deaths, ten must be added to the first column, which will make the number of the miners killed during the present explosions, there being a difference of upwards of ighty deaths in favour of the last year. The numper of explosions producing fatal consequences were sixty-nine in 1848, fifty-two in 1849, and 1850 there have been forty-three. We may fairly presume that this diminution in the number of accidents from this cause, and the decreased fatality which has resulted from those which have happened, is to be ascribed, in a great measure, to the increased attention which the ventilation of mines has received, and it is to be hoped that these indications of practical improvement will be confirmed and extended. In devising re nedics for these evils, the Govern-

ment authorities and Parliamentary committees have confined their inquiries too exclusively to explosions, and have not attached sufficient importance to those less obtrusive but constantly occurring causes of sudden death which produce by far the greatest amount of suffering. It appears, from the above statement, that whilst the deaths from exploaugmented. During the last year, it appears that those killed by falls of the roof even exceed those with the two preceding years, deaths from this cause are on the increase. That very many of prevented, no one practically conversant with the subject can reasonably doubt. At the Camden station there are fifty-three drivers and fifty-three stokers, including those engaged upon the Dock Junction line. The question of "content" or "non-content" had on Monday night been put to every man who was to be met with, and we are informed that without an exception they expressed themselves satisfied with their present

Upon the northern division also the men have almost universally consented to the proposal of their superintendent for a three months' notice. Upon the northern division of the line applications for the situation of driver have been received from no fewer workshops of the company. Upon the southern division applications have been received from 128 men, and forty-two have been already engaged.

Up to this period notices to quit have been given to thirteen or fourteen men only upon the southern division, and it is believed that it will not be necessary to extend them to beyond one or two more. These men, who are stated to be some of the most inefficient upon the line, have also received notice that they must give up their cottages in a week, but time enough to enable them to remove their furniture, a longer interval will, upon representation, be permitted them.

THE GERMAN DEMOCRATIC PARTY.

2.-The Revolution and the Present Condition Parties and of the Nation.

On the 19th of March, 1848, the King of Prussia proclaimed the election of a National Assembly, "on the largest Democratic basis." The Assembly was elected, and met in Berlin, "to enact the fundamental law of Prussia." At the same time a National Assembly for Ger-

They granted more than their peoples were prepared wisely to use and to secure; for the revolution in Germany at first raised to popular power the with a shout of execration from those who were only well-organised Liberal party, that constitu-tional party which neither originated nor sprang from the revolution, which was not imbued with its tendencies and principles, nor, consequently, capable of conducting it to success. The policy in which this party had been educated was that of extorting partial reforms by the fear of revolution. That policy was clearly only applicable to a time in which revolution, being still only in prospect, the Kings might be induced to concessions for the sake of avoiding it, and bound to the faithful observance of policy, if the world's history had not long ago shown that the words of princes are no sufficient guarantee for the liberties of their subjects; but knowledge of human nature ought to have fore- date. warned the constitutional party, compromise after revolution was to divest and destroy the revolution itself, and to secure nothing for the people; for the mere selfish policy of the Kings could no longer be to avoid a danger which had already arrived, but to out of her sleep at night by Mr. Sloane, Mrs.

This reasoning was not then understood by the Constitutional party. They obtained a majority in the assemblies of both Berlin and Frankfort. And one of the first resolutions of the Berlin Assembly, abandoning the principle of popular sovereignty, was to declare that the representatives of the people had not to enact of themselves the fundamental law of the country, but to make a compact, a bargain (eine verfassung zu vereinbaren) with the king. The Frankfort National Assembly did, indeed professedly proceed to enact the fundamental law

In the month of October, 1848, the Democratic party, united as a majority at Berlin, voted Unruh St. Thomas's Hospital a fortnight ago, and that he would have been supported by all German patriots, would have united the nation and realised its liberdrivers of thirteen or fourteen years' standing on the ties; he chose a different course, and turned out the National Assembly by military force.

Thus the King of Prussia himself converted Royalists into Republicans, and Constitutionalists into Democrats, and ranged against the existence of his house a majority of three-fourths of the constituencies of the kingdom. The first electoral of equal and universal suffrage, a new electoral law, trate's advice how to act upon an occasion which population, was now octroyed in the old form of a Sabinets order. The Democratic party, under the advice of their committee, abstained from voting; Minoritis-Kammer).

The tale of Prussia, repeated with more cruelty, more bloodshed, and more reckless perfidy, is essentially that of Austria. Throughout all Germany the effect is the same; the revolution of 1849, and organised one great national democratic party; Germany has played its part in the great revolutionary game which was to resolve Europe into two

It may be well to name some of the leading men of the German Democratic party at Frankfort, in Baden, and Saxony. In the Frankfort Assembly the leading Demo-

crats were, Blum (shot at Vienna), Ruge, Trützschler (shot), L. Simon von Trêves, Loewe von Calve, H. Simon ven Breslau, Voigt, and Raveaux. The three last were elected to an executive committee of all Germany by the short-lived parliament at At the head of the Badish insurrection were-

Hecker, Struve, Blind, Brentaux, Goegg, and others.

The leaders of the insurrection in Saxony were -Heubner (since imprisoned), Todt, Zschirner, and Bakuinne (a Russian emigrant, since imprisoned). The Prussian opposition has the advantage of not being banished from the country.

Constitutionalists are now, as a popular party, no more; Royalist Democrats have surrendered their hopes of teaching real constitutionalism to Prussia's king, and are merged in the great Republican or Anti-Royalist Democratic party. The ponular hones which centered in Prussia are disappearing; she is bound hand foot to the new Holy Alliance of the kings, and that new Holy Alliance is no longer a union of independent monarchs for a common political object, but it is a league dominated and guided by the immense powers, the obstinate traditional policy of aggrandisement, and the secret and corrupt machinations of Russia. In Germany the people have become Republicans : the monarchs, whether they will or no, are being drawn within the toils of the Cossack.

To keep down their subjects, whom they have converted into their enemies, they have armed the people against the people. But they are on the horns of a dilemma; they cannot permanently keep up their enormous armaments, if they attempt it they hasten the period of a recommencement of revolution; if they disband their armies, they distribute amongst the masses of the people a disciplined and military and really hostile population, which it was most easy to control by keeping it under the discipline of army regulation. The Badish, the Hessian, the Hungarian, and even the Prussian and Austrian army, have their martyrs on the battle-field and the scaffold, and are penetrated by the influences and by the spirit of 1848. The former appear themselves to dread the results of a defensive policy, and to be uneasily anxious to engage in some armed

Instead of the juvenile organisation of German Democracy in 1848, it is now united in its objects it possesses chiefs of political experience and tried character; and it comprehends three-fourths of the nation. It is agreed in desiring the unity of the nation, and the destruction of the ruling dynasties. It is agreed in seeking to realise the sovereignty of the people, by the re-establishment of Universal Suffrage. Recognising the principle in this practical form, if it accomplished a revolution in Prussia, it would return to the National Assembly dismissed by the King by force of arms, in 1848; if in Germany, it would revert to the Parliament dissolved in Stuttgardt, in 1842, after the failure of the 13th of June at Paris.

The political question, national unity, popular liberty, and the Republic, is the question in Germany-Social theories differ, and are the origin of differing schools, as in France; with an instructed, a thinking, and a speculative and philosophizing people, it cannot be otherwise. But there is this great difference between the two countries, that Germany has thirty-four princes to overthrow, the national unity to accomplish, and the Republic to obtain; in fact, one stage of the political question to go through, before social theories can become anything but a subordinate question in the
