In sober seriousness I ask my fellow-countrymen. Is is wise or safe to enter on a game where gain is desolation, where less is subjugation ?

Have I mistaken the progress and effects of rampant competition ? Let it be shown. Words, in my opinion, are too weak to give the full description of the deaths, disorders, lesses, and derangements that must universally follow when the greedy worshippers of 'Cheapness' are let loose upon mankind. Language cannot describe the fall of those mighty and multitudinous interests that will be engaged in mertal conflict for existence when 'free selling as well as free buying, or Free Trade, fully and fairly carried out,' shall have become the law of the whole earth.

In England, as elsewhere, every branch of manufacture and agriculture, with the hundreds of millions of persons and the thousands of millions of capital engaged therein, must be subjected to perpetual fluctuation. Each counting house would imbibe the restless, agonising spirit of the Stock Exchange ! The breasts of employers and shopkeepers would be tortured and racked between the perpetual flickerings of hope, fear, and despair! The workpeople could never calculate their carnings, or the certainty or nature of their employmentsthey would necessarily become reckless and improvident-uncertainty and anxiety would drive them to distraction ! In fact, the minds of all would be as 'stretched on tenter hooks'-life would become burden-the grave, man's sole repose. But, 'In those days shall men seek death, and shall not find it ; and shall desire to die, and death shall flee from

Our manufacturing towns-Birmingham, Bradford, Coventry, Glasgow, Hanley, Huddersfield, Leeds, J.eicester, Manchester, Northampton, Nor-wich, Nottingham, Sheffield, Worcester, and other places, would change their manufactures, inhabitants prices, and wages, at the bidding of their foreign ened by successive losses, would be driven from the field of competition, crippled, disabled, ruined! At last, the 'oheapent' being the winner, would become the workshop of an impoverished world.

Do you imagine that manufacturers and tradesmen will cease to operate when losses overbalance profits 3 Then are you ignorant of the effects upon the human mind of unrestrained competition. Thereby man is goaded to madness; he forgets the tradesman's feelings and habits, and unconsciously becomes a reckless gambler, willing to risk his all upon "the

Gentiemen,--I sincerely thank you for your kind atten-tion. When I began taking the Revalenta, I was in as deplorable a condition as can well be imagined. I was confined to bed, and so weak that I could neither stand nor walk, suffering severely from flatulency, constipation, and indigestion, and being compelled to have recourse to and margeshon, and being compensed to nave recourse to aperient; every second or third day; and upon one oc-casion 1 swallowed no less than seven doses within twenty-eight hours, under medical advice. There was a gidincos in my head, and a singing in my right ear, that gidincss in my head, and a singleg in my right ear, that, when I turned my head upon the pillow, it resembled the sound produced by a slight touch on a musical glass. I had a pain and a sort of fulness across the chest, a sore throat, and a slight cough; but the pain around my loins was to great, that I could not remain in the same position for ten minutes all night long. The principal seat of the pain seemed to be just below the ribs on my left side and about three inches from the back bone. I commenced taking the Revalenta, morning and evening, boiled in water and salt, and in less than a fortulght my appetite was greatly improved, and flatulency and consti-pation so far vanished that I have not tasted a pill or drug of any kind since. I am much stronger, can walk steadier of any kind since. I am much stronger, can walk steadier and less like a drunken man, &c., &c.–John YAs's Southwick Park, Fareham, Hants, Oct. 31, 1816.

Every working man in this country should understand that the approaching contest will be between Russell and patronage, Peel and retrenchment. And we already glean from the new programme, that Russell is about to marshal the Irish landlords under the specious pretext of giving them a Committee upon the Poor Laws, thus keeping this staff together until their votes shall have been secured upon his grand financial policy, and of which they will be hopelessly ignorant, and for which they care not a farthing, so long as they can relieve themselves from the burden of maintaining their own poor, and so long as they can secure the aid of the military and police in the collection of their rack rents. Meanwhile, the English working classes must keep their minds steadily and stedfastly fixed upon the Labour Question, and the application of domestic industry to the soil of the country.

Numbers of the inhabitants of Wieselburg, as well as of Rash and Komern, carry on an immense corn trade, and are enormously rich, so that the Croatians no doubt found good booty, unless the Wieselburgers had packed off their valuables before the arrival of their rapacious visitors. It is said that the imperialists lost at Wieselburg two generals, four staff officers, and fifty-seven sub-officers. On the other hand, the Magyars lost, in prisoners alone, 792, who were forwarded to Olmil z.

Meantime the Magyars claim a complete victory over the troops of the well-known Pastor Urban, who has been taken prisoner. On the 16th ult, the defile of Jablunka, which leads from Moravia into Hungary, was entirely in the hands of the Magyars, who had rendered it impassable even for smugglers. It will be self evident, then, that if any material re- nated his life on Sunday. The Jury returned a trenchment be effected, it must be upon our armaments, the cost of which has been increased £7,000,000; and this during a period of profound peace, and in the absence of all revolutionary convulsions, and whilst each successive speech from the throne assured the assembled parliament of the peaceful disposition of all foreign powers. But if we take into calculation the present reduced value of commodities, it will be found that £10,000,000 expended upon our armaments now will go much further than £11,657,000 did in 1835; and I suggest that you propose the former sum as the maximum expenditure for the army, navy, and ordnance, by which you will gain about £8,500,000 of the pro-posed saving of £10,000,000. I by no means, how-ever, wish to commit your association to £10 000,000 as the minimum cost of our armaments, for I believe that you will live to see the waste reduced to taken mere readily by the millers at fully former prices. We had more buyers of foreign wheat, both free and in-bond, but to effect sales of any quantity lower terms were submitted to. The flour trade was very heavy, but not cheaper. Owing to further large arrivals of foreign barley prices were fully is lewer, and sales very limited. Malt very dull. Becaus and peas sold slowly, and is cheaper. Foreign rys was offered on lower terms, but though the arrivals were not large, and good qualit es offered fully is per gr. under former prices. Linseed of commodities, it will be found that £10,000,000 posed it might be by the dogs which what dogs has the miximum cost of our armamonus, for reduced to offered fully is per qr. under former prices. Linseed would be enabled to have cleaned the orbits of the less than half that sum. The remaining £1,500,000 and cakes were dull. Tares continue very dull. Noto complete the proposed reduction of £10,000 000 | thing yet doing in cloverseed. The current prices as it must have been rats or mice. Mr Obré, in con-tination, said that the flesh was also eaten from both hands, and that since the body had been locked up, and the dogs removed, he found there had been still more eaten. He found, at the apex of the right crown lands. And he adds, 'I repeat emphatically, 45s; ditto red, 38s to 45s; Devon and Somersetshire, red, all hopes of any material relief from taxation hinges upon the question of a large reduction in the cost of our army, navy, and orduance.' Mr Cobden contends that to facilitate a reduction in the amount of our armaments changes must be effected in our colonial and domestic policy; the principle of non-interfer-ance in the affairs of foreign countries must be are ence in the affairs of foreign countries must be carried into practice; the colonies must support their own civil and military establishments; and finally, that we must endeavour to act at home more in accordance with the good old constitutional principle of governing by the civil, and not the military power. 'We are, I fear, tending towards too great a reliance upon soldiers, and too little on measures calculated to insure the contentment of the great body of the people. It was madness, indeed, to think of relying on bayonets for the permanent support of our institutions, after the warning examples afforded by so many countries on the continent, where so lately we many countries on the continent, where so lately we town and country buyers was good, and the weather de-saw military despotism crumbling beneath the cidedly favourable for slaughtering, the beef trade was in weight of its own intolerable costliness. And even a very inactive state, at Friday's depression in the quota-if armed authority has everywhere resumed its sway, has that solved the problem of their financial embarrasements ? On the contrary, they have only entered again upon the more vicious circle, where entered again upon the more vicious circle, where scription of stock was heavy, at a decline in the price of enermous armaments, lead to increased expenditure.
