Sir,-I feel pleasure in being able to bear my strong and unsolicited testimony to the excellence of your Frampton's Pill of Health, which I consider a most safe, efficacious, and very superior, general medicine. The widow of an officer, an elderly lady, and near relative of mine, has used them—very rarely having recourse to other medicine for a long period of years. She has recommended them extensively, and in one instance, in which she induced a person to adopt them, and supplied the first box herself, they have proved of extraordinary efficacy. I think that, perhaps, there is scarcely any other of the many patent medicines before the public of equal value as a 'friend in need;' certainly none pos-sessed of superior claims. I shall be happy on all occa-sions to give them my individual recommendation; and am. Sir, 'Your obedient servant,

You will think, perhaps, that people would be disparishes interfered in this manner, and engressed so much of the business to themselves as corporate bodies, To this I answer, that they would be wiser than to usurp the trade of the country for the sake of trade, but only in such matters as experience showed the public safety required. Besides, if such a people as this had not wisdom who had such freedom to acquire and make use of it, where must we expect it? For consider, there men, nor their minions, to quash every project that does not first or last tend to increase their revenues. My people would give every one a fair hearing that had any thing to propose for the public good. Neither would chance to fall into them, because ne obstacle remained to hinder them to change them.

In the advanced state of learning which the world is now arrived at, there can be no want of cultivated abilities everywhere sufficient to conduct the public business. All that is wanting is a good system, in which men being placed in a state of equality and freedom, the reasoning faculties would be encouraged to expand to the utmost And such a system is this which I have given you s I remain, &c. sketch of.

Owing to its length we shall only give the following extract from

# FINANCIAL STATE OF EUROPB.

(From the Brussels Nation.)

No one can doubt that the commonical and financial position of Europe has been in a great degree the cause of the late convulsions which have occurredequally in these countries in which political causes have produced the revolutions, as in these in which apparent tranquillity now exists. A coup-d'wil, therefore, at the general financial state of Europe would be a criterion for measuring the interests of the crisis and its probable results. That part of the people is the debt caused by the long wars into which patch of business ! the various countries have entered during and since the reign of Louis XIV., and especially at the com-mencement of the present century, and the expense and maintenance of the permanent armaments which making our own laws; so in truth and reality we are in bondage and vascalege to the landed interest. THE FINANCIAL REFORM MEETING IN MANCHESTER.

We recommend the report of the proceedings in the Free Trade Hall, in Manchester, to the working classes, and from it they will gather more than the mere attempt to reduce Whig patronage by the amount of ten millions centuries of oppression which has so long and a year. They will see that Mr Cobden proso unhappily constituted the stock-in-trade of poses a return to the expenditure of 1835, merely as the first step in the march of progress, and then, he says, he will go farther. practice has been to array Celt against Saxon, The reader must understand that the affairs ties, of barbarous times, without introducing of a country, long based upon the principle of one single practical measure for the correction patronage, cannot be altered, as if by magic; tion of middle class ascendancy, it required time for that class to muster its strength against the old Country Party, whose power, though shaken, has been temporarily upheld by

What we glean, then, from the new developement of Free Trade strength is, that now the battle—the real battle—must be fought between the upper and the middle classes-between the owners of land and the owners of machinery—and this is the very phase in which we have long viewed the coming struggle. Not that we base the hope of the employed upon the political success of the employer, but that we found the future prospect of the Labourer upon the good old maxim,

The union medical men let out, on the first alarm, the true cause of the excessive mortality. They recommended the abolition of better to have the meat roasted. They further recommended more warm clothing, both for the persons of the children and the beds. Thus showing clearly that it was owing to a system of deliberate starvation, both as respects food and clothing, that this appalling plague had broken out among the children. It has been called Cholera. Perhaps it is; but we can only say that the symptoms by which its attack was prefaced, are not those usually ascribed by medical men to Asiatic Cholera. That is said in all cases to be preceded by 8 tendency to diarrhoea; whereas, in this case, instead of the usual premonitory symptoms, "the first indication of attack has, in almost every instance, been the sudden bulking up or vomiting." Afterwards the ordinary symptoms of confirmed Cholera appeared. We must not, therefore, blame the Cholera, nor County Lunatic Asylum was drained, for this found one hundred and sixty children labouring under violent suffering, lying four or five in a bed. Fifteen hundred thinly-clad, scantily-fed children, were crowded into a place which was not calculated to give accommodation to more than five hundred. BROTHER PROLETARIANS.

A year ago ' the mob of nobles, statesmen, priests and king,' little imagined that their usurpations were destined to encounter the rude shocks of 'revolutionary violence.' Blind and deaf to the signs of the times, they saw not the rising of the waters, they heard not the mutterings of the approaching storm. If for a moment some misgivings of the future haunted them, they took refuge in the consoling but cowardly reflection: 'after us the deluge. The annihilation of the 'Sonderbund,' the popular risings in Italy, and the social anarchy in France, all failed to enlighten the blind tyrants of the nations. £1 15 3 of Louis Philipps we can have nothing to fear. our authority, cannon law shall recall them to act very irrationally.

many. But the 22nd of February came-when the cry for Reform' was to be answered by the old and 0 favourite argument of kings and statesmen-force. 'All right,' said Louis Philippe. 'I am so safe in the saddle nothing can shake me.' The 23rd saw the royal Jew trembling in his palace, and like a drowning man catching at atraws, turning once more to his old arts of cajolery, hoping by a dexterous shuffling of the cards to keep up the pleasant game of humbug a little longer. But it would not do. THIERS and ODILLON BARROT were rejected by the people. The 24th—ever memorable, ever glorious day—arrived, a last trick was tried and failed. The abdication in favour of the 'Count de Paris' was proncunced by the Vox Populi:—'TOO LATE!'
The royal usurer transformed into 'Mister Smith.' concluded an ignominious flight by taking refuge in this favoured resort of bankrupt kings and insolvent statesmen. The Republic was once again proclaimed, and through the length and breadth of Europe, reverberated the 'joy-shout' of the millions-the tocsin of Democracy: 'Vive la Republique!'

of the French Revolution was not altogether unfelt. A portion of the people railied to the cry of 'The Charter.' Agitation and enthusiasm gave birth to excitement, and many believed that the hour of popular deliverance was at hand. The righs of a revolu. tionary struggle grew thick and fast in Ireland. EXECUTION AT YORK - On Saturday last the lad Malkin was hanged at York, for the murder of Esther Inman at Leeds. The influx of strangers from Hunslet, Leeds, and other parts of the West Riding, was very great, and these consisted for the most part of persens who had been evidently walking during the night, and who entered the city at an early hour, evincing unmistakable signs of the effect which the severity of the wenther had had upon them. Joseph Austin and a man of the name of Longden, two plate-layers, instantly fell to work, not to save but to drink the gin, and they were joined by another man named Scott, Austin drank so freely that he died the same night, and Longden was with great difficulty saved from the same fate. On the following day an inquest was held on the body of Austin, when the jury returned a verdict of 'Died from apeplexy, produced by drinking ardent spirits.' Scott was taken before the magistrates at Retherham and fined £5 for neglect of duty, and Longden remains almost without hope of surviving the effects of his debauch; but should he recover, he will most likely be proscented and fined for neglect of

EXTENSIVE ROBBERY OF BILLS OF EXCHANGE PROM THE ROTHERHAM RAILWAY STATION .- On Tuesday evento the Sheffield Banking Company. It is customary for certain account books to be transmitted by railway in an oaken box from the branch office of the Sheffield Banking Company, at Rotherham, to the principal establishment in George Street, Sheffield. On Tuesday week, in opposition to the practice, thirty-seven bills of along with the books, and having been properly fastened. it was carried in the evening by a junior clerk to the box on the counter in the corner of the room where as usual. It did not so turn out, however. The circumstance of the non-arrival of the box at the Sheffield office was not of a nature to excite apprehension, and probably it was never thought of again till the following Thursday morning, when tidings were conveyed to the manager of the Rotherham branch that the identical box had shortly before been found in the river, by some men who had occasion to drag the stream some distance below the Rotherham station. It was tied up with a cord, the same as when despatched from the bank. On being opened, the books were found in their place, but the bills had all been abstracted. On inquiries being made at the Rotherham station, it transpired that the box had not been seen there at all on the Tuesday. I: was clear, therefore, that it had been stolen and carried away in the interval between the clerk leaving it at the station and the return thither of the station manager. ## THE STANFIELD HALL MURDERS.

FURTHER EXAMINATION OF RUSH. Norwich, Tuesday. - Yesterday, James Blom-

the beach. This unexpected examination took place in order that the prisoner (Rush) might hear the additional statement which Emily Sandford had made at the last meeting of the coroner's jury, and which had not been taken in the evidence sworn before the magistrates on the occasion of their fully committing

On Rush being brought forward by Mr Pinson, the governor of Norwich Castle, the prisoner's unhappy dupe, Emily Sandford, was introduced by Mrs Bryant, the matron of Wymoudham Bridewell, in whose custedy she still remains. Having been duly sworn, she went into a more lengthened detail of the prisoner's conduct on the night of the murder than she gave before the coroner. She minutely deseribed his coming to her bed-room door on the night of the murder, and his gently knocking for admis sion : that on his entering he leant against her bed, and she, perceiving his violent trembling and agitated state, inquired of him 'Good God, what is that if any one asked her how long he had been out, to say that he had not been more than ten minutes one case.—(Signed) W. J. Kitz, surgeon, &c.' It is was again employed in a personal conflict with some away. That she again asked him what was the matter, and that he replied, 'Nothing; but you may hear of something in the morning.' All there facts we:e reduced to writing, and others which tended to show the intimidation he evidently held out to the unfortunate creature not to divulge his move-

Rush's manner towards the witness on this occasion was calm, and contrasted strongly with his violent behaviour towards her on her former exami-

The search for the weapons with which the witnesses are positive the murders were committed, still excites the greatest attention. In an official letter the search is thus described:- 'The Potash Farm is no longer in the actual possession of the police; one man is, however, still kept upon the premises. To discover the pistols, twenty pits have been pumped out, and every particle of mud removed from them: had a pencil case been at the bottom, it must inevitably have been found. The fences and ditches have in like manner been cut down and drained out-every rabbit or rat hole has been probed to the bottom-furze and other bushes grubbed up-muck heaps, turnip heaps, mangel wurzel heaps removed—turnip fields most minutely examined-ploughed lands peforated with heavy orow-barz-grass fields pierced with iron spears having arrow points, so that no loose sod could by possibility avoid detection. To test the labourers and policemen employed in this labour, pieces of turf were cut out in different parts of the fields in which they were placed, and replaced, so as to be impos sible to be discovered on one most minute inspection. They were all found and brought on the points of the barbed arrow on which they were pulled up. In the house, fire places, hearths, floors, have been removed, chimneys examined, house earpenters and masons employed in every part. Only one stack required in the barn for thrashing. The fiel at the back of the garden has been completely dug up from one end to the other. Every tree in the park has been mounted and minutely examined. In fact, such a search I really believe was never made before. Not that the evidence of the pistols is now at all necessary, in my humble opinion, but to satisiy the public mind, and the country in general.' Several interesting facts have been collected by Michael Haydon, a shrewd officer of the London (City) detective police force, which will tend to establish a strong chain of evidence in support of the

It is not the intention of the authorities to apply for a special commission to try the accused. Mrs Jermy, and the maid, Eliza Chestney, are progressing favourably. As soon as practicable, it is the intention to remove Mrs Jermy to London.

We (Brussels Herald) attended last Wednesday, an experiment on a large scale, which demonstrated in the most efficient manner, that henceforth this danger no longer exists for the pitmen. By means a working model, but in a pit of some depth : the apparatus was worked by men who remained suspended in the well when the rope broke short off. For the future the parachute for coal-pits is no longer a theory; its efficacy is now established by practical facts. The effect of this apparatus was shown before a numerous company, comprised of men of information, the greater part familiar with the working of mines. Their satisfaction was so great that they spontaneously offered to the inventor to make affidavit on the spot of the facts to tried upon himself; the rope having snapped he and the workmen accompanying him were spontaneously stayed without feeling the slightest shock. We shall not fail to acquaint our readers of the new guardians directed one of their medical officers to evidence of Juan De Kaltizani and others, countryin the working of mines.

CHOLERA AMONGST THE PAUPER

CHILDREN AT TOOTING. The following official report of the state of the juvenile pauper asylum at Tooting was on Tuesday night forwarded to the various boards of guardians who have children in that institution :- Surrey Hall, Lower Tooting, Jan. 9, 1849, 6 p.m.—I have to report respecting the cholera cases here that the numper of fresh ones are on the decrease, and that these do not present the very severe symptons that the first cases did. We have had fourteen new cases of children attacked with cholera symptons, eleven with diarrhesa only. The number of deaths from cholera in the twenty-four hours have amounted to sixteen. The rest have been removed to the convaescent wards. From the numbers that have been removed altogether, we hope that of the few remaining a very small number will be attacked with the disorder. Upwards of one hundred have been removed from Tooting belonging to the Strand Union. The chloroform was administered last night and today by inhalation with very good effect in more than generally considered that this return from Mr Kite, so far from showing that there is any actual diminuion in the number of attacks and fatality of the disease, the contrary is the case, when the diminished numbers now in the asylum are taken into considervion, nearly 1,000 children having been removed.

STRAND UNION. - The guardians of the Strand

Union have hired for three months the premises of the Society of the Refuge for the Destitute in Ogle Street, Marylebone, and have removed to that place their pauper children heretofore resident at Tooting. ST PANCRAS.—A meeting of the directors of the peor of St Pancras took place on Tuesday, when a report from a committee appointed to visit the establishment at Tooting was read. The following report was also read from Mr Bird, a medical gentle-man, specially appointed by the board to attend the St Panoras children since their removal. 'To the directors of the poor of St Pancras -Gentlemen .-At your solicitation I have undertaken the medical superintendance of the children recently brought home from Mr Drouet's establishment at Tooting. where Asiatic cholera had made its appearance, and received about 200 children on Saturday last. Two were taken ill as soon as admitted. Acting upon the principle 'that prevention is better than cure,' I carefully examined each of them, and administered appropriate medicine to all. I visited and watched every child in their beds every half hour during the night; and although many of both sexes were relaxed, I had no cases that exceeded the premonitory symptoms, which counter-irritation with calomel and opium checked, and every child arose on Sunday morning apparently in good health, and made a most hearty breakfast of bread and milk. I must say, in justice to Mr Drouet, as far as an observer could have judged, the children generally looked well and for the attention bestowed by all parties. In the afternoon, ten' more cases occurred. Some of those

in good condition. Unfortunately this state of things did not contince. They were evidently predisposed has been removed; but each remaining one will to the epidemic, and ten were attacked. Boil d undergo the like examination, whenever it may be mutton and bread was given to each child for dinner, and they appeared cheerful, hearty, and thankful that were in a state of collapse, seemed improving. On the night of Sunday, about thirty were more or less attacked, leaving about fifteen of each sex under treatment. During the whole of Monday only one case occurred up to eleven o'clock at night, and I was greatly in hopes that I should have been able to re-port this day (Tuesday) most favourably, but seventeen were attacked during the night, and three have reached the state of collapse, notwithstanding every attention on the part of Mr Wilkinson, his assistant, and myself, leaving the statistical account at present as under:-Number attacked, 67; deaths, 6; under treatment, 27; state of collapse, 4. I cannot close this report without bearing my humble testimony to the prompt, ready, and efficient assistance rendered Eaton, and all parties acting under my directions, as well as making mention of the unlimited power you

MARK LANE, MONDAY, JANUARY 8th .- Owing to sided ever by the High Bail ff of Westminster, for the the large arrival of foreign wheat, though the English supply was very short, the trade was dull to-day for Essex and Kentish wheat at last Monday's prices. Foreign free wheat met a slow retail demand at rather lower prices, and we had not so much inquiry for bonded. and introduced Mr Lushington, M P. for Westminster, who proposed a resolution approbatory of the Leignor Cester Square Sosp Kitchen and St Bernard's Hospice. He said, he applauded the conveners and objects of the meeting, but, at the same time, thought that something meeting, but, at the same time, thought that something of a more extensive kind should be adopted. Individual exertion was not sufficient, however well interest tentioned. We wanted means, and the way to obtain them was by a reduction of expenditure. Let the Army, Navy, and Ordnance estimates be reduced, as well as other public establishments. (Loud cheers.)
