There is another reason not to be passed over in silence by The Nation. A large class of persons in this country are deeply impressed with the conviction that if the Confederates had had only steel and fire to encounter in '48 we would ere now have had an end of foreign rule and social misery. If the priests suppressed the insurrection, we cannot refuse to admit that the Confederate leaders had them.

CULTY, will also be found to be England's greatest difficulty—not only the difficulty of not refuse to admit that the Comederate leaders had themselves largely to blame. They excited a profound jealousy of their ultimate designs among the clergy, by indiscreet writings and speeches; which to men who did not know them, and who had been systematically prejudiced against the English people—as swarms of banished trishmen will come to the Saxon land, to comthem, meant many things they were never intended to Irishmen will come to the Saxon land, to commean. They were guilty in this of a fatal error for which nete with Englishmen in their own Labour hey have paid a terrible penalty. Perhaps Thomas Meagher and The Nation were the chief sinners in this respect. If so let it be known that they saw their error and admitted it. In the last conversation between Mr. Duffy and Mr. Meagher in Richmond Prison, the former said "You and I committed a blockhead blunder my friend—we arrayed against us the most vital institution of Irish Ireland, by against us the most vital institution of Irish Ireland, by mere folly. O'Connell told the priests we were their enemies and as if to conform this calumny we uttered and published many things absolutely certain to be misunderstood by them. And behold the result—an attempt to raise the country without their help; a project as feasible as raising the Scottish highlands a hundred years ago without the story movement must be based more largely on the religion, the sympathies, the old traditions of Irish Ireland, by mere folly. O'Connell told the priests we were their enemies and as if to conform this calumny we uttered and published in the old Holy Well."

BLAIR'S GOUT AND RHEUMATIC PILLS. The acknowledged efficacy of BLAIR'S GOUT AND RHEUMATIC PILLS, by the continued series of Testimonials which have been sent to and published by the proprietor for nearly twenty years, has rendered this medicine the most popular of the present age; and in corroboration of which the following extract of a letter, written by John Molard Wheeler, Esq., Collector of Customs, Janaica, having been handed by his brother, at Swindon, to Mr. Prout for publication, will fully confirm.

"I know you have nearly bed considered. "I know you have never had occasion to take Blair's Pills, but let me emphatically tell you in mercy to any friend who may suffer from gout, rheumatic gout, lumbago. sciatica, rheumatism, or any branch of that widely-allied family to recommend their using them. In this country they are of wonderful efficacy: not only am I PERSONALLY aware of their powers, but I see my friends and acquaintances receiving unfailing benefit from their use. I would not be without them on any account. If taken in the early stage of disease they dissipate it altogether: if in a later, they alleviate pain, and effect a much speedier cure than by any other means within my knowledge."

IF MANKIND are liable to one disease more than another, we require to have a knowledge of over the rest, it is cer tainly that class of disorders treated of in the new and in proved edition of the "Silent Friend." The authors, in thus sending forth to the world another edition of their medical work, cannot refrain from expressing their gratification at the continual success attending their efforts, which, combined with the assistance of medicines, exclusively of their own preparation, have been the happy cause of mitigating and averting the mental and physical miseries of imagating and averting the mental and physical miseries attendant on those peculiar disorders; thus proving the fact, that suffering humanity must always derive the greatest advantage from duly qualified mombers of the medical profession adopting a particular class of disorders for their avaluative trials is practically class of disorders for their exclusive study, in preference to a superficial knowledge of all the diseases that afflict mankind. The third article is so good that we shall take the liberty to transfer in fall to correct the correct transfer in fall to correct transfer in fall tran it in full to our celumns.

LOUIS BLANC'S ADDRESS TO THE OPERATIVES ASSOCIATIONS.

To the detractors of association, you have replied

To-day they exist in hundreds in Paris, in all the great cities of France-even in Belgium. God knows by what labours, at the cost of what sacrifices you have arrived at such results, and futurity will render you justice for it. Yes, we shall soon be able to trace the history of so many unknown selfdenials, so many modestly-heroical efforts, and eo; le will see what you had to encounter to give notion and life to noble ideas, to overpower routine, o defeat the plots of irritated capital, to surmount he obstacles raised in your own cause by distrust and jealousy. Alone, abandoned to your own feeble esources by the State which ought to have been your panker, if it had understood its mission, you have fictoriously struggled against the pressure of the old

Even should you have failed, no conclusion could have been fairly taken for the condemnation of our principle. Who knows not the incertitudes, the difficulties of a first debut? In the stormy seas of the new world how many vessels were lost on still ments passed with all the forms that render a consucceeded. In all the towns surrounding Mantraced safe and invariable roads! If among so many associations which rise and prosper, some are seen to perish at their very birth, others after a brilliant beginning suddenly stop and languish, it is elsewhere than in the inanity of fundamental bases, that lie the causes of such disasters. Well! it is of the greatest importance to find out these deleterious causes, to produce them to light, either to confound dishonest detractors, or to enlighten associations on perils to

In the first place let us remember that all the established associations do not own the same origin, that is the desire of preparing the affranchisement of labourers, and of putting an end to the speculation of man by man. Wherever the magic word Associa-TION was seen, the people ran in crowds. At the end of a month's existence, some of those associations had attained a colossal extension. Certain masters on the verge of bankruptcy pulled down their signs,

decorated their shops with the emblem of an equalising level, and continued under a mask, to speculate on the their workmen and the public; nothing fraternal was their in reality but the assumed characteristic, but the fraud was soon discovered, customers disappeared; the speculator must stop; but the fall of the enemies to association was laid on the principle of association itself. It would be unjust to require of the mass of la-

new and unexpected to them, in which everything is in flagrant contradiction with their received ideas, their prejudices and education. For that very reason, it would have been advisable for the creators of the first associations to have shown themselves most rigid in the choice of those whom they admitted to share their labour. Unfortunately it has not been so. All those who have entered into the associations have not brought with them the same spirit. By the side of fervent apostles of the principle, by the side of the courageous initiators who detyoted themselves to realise its application, by the
side of those who had not concealed from themselves
the difficulties of the enterprise, and held themselves

Some enterprises had commenced in the most brilliant manner; they had accomplished great and important works, realised considerable profits, and behold, that prosperity suddenly vanished to make room for ruin, under the blow of a commercial catastrophe, the result of the associates' inexperience. We must not be too much astonished at this. For The first time the operatives saw themselves taken out of the narrow sphere of a factory. The directors of associations, operatives like their brethren, were called upon to manage commercial operations often andertaken upon a large scale! their practical science This is sufficient to show how important it is for the choice of those who are to direct them. In the acc-implishment of so graves duty they must deal treely with all questions of persons. Choose, for the the most honest, the most honest. next thing to do, is to connect them? all, one with another. Behold the object to which must now tend all your efforts. To attain this object, here I suggest the exposition of the means that might be used.

There should be established, under the denomination of Committee of Associated Operatives, a council, in which should be represented all the associations based upon the principle of fraternity.

The Lancashire Beacon. We have received Nos. III., V., and VI. of a new penny weekly periodical, published at Manchester. The This council would have for its mission:

Traiton—a beautiful work of art. Both these publications continue to deserve our warmest good wishes.

Volcano had exploded in Staffordshire—and the people, frightened at their own violence, had once more hugged their chains to their weary hearts. Nosly and manfully, notwithstanding these draw-backs, did the delegates proceed to their work; surrounded by hostile forces, they still proclaimed a continuation of the strike, their very words were words calculated to inspire a revolution. Listen to their glowing eloquence: "Brother Chartists, the

To centre all individual efforts; To investigate the great questions of production and repartition. To help in the formation of nascent associations, and the developement of those that are in existence; To control the mutual intercourse between asso-

ciation, for the exchange of produce, the loans, advances of money, tenders, bills of exchange and circulation. &c.

They would exercise upon all associations a fra-ternal watchfulness, and would impart to them that uniformity of movement which is so desirable. Some associations exist in the provinces and in foreign countries; the committee would take it upon themselves to open relations between these and the Parisian associations.

At last, they would occupy themselves with open-ing outlets to their produce by means of exportation, that source of labour so indispensable to the continental support of great factories.

Independent of that committee, the associations

would preserve their special direction, as well as the disposal and management of their capital. Such is, my friends, the plan which I submit to your meditations.

The hour is drawing near, I am convinced of it, when democracy will be in power, and when the abolition of the labourer's servitude shall essentially be the state question. For Socialism is coming with the insuperable might of the ocean waves; it ascends. always ascends, and will in the end reach the heights of society! But until that decisive moment arrives, you have to take in hand the care of your own emancipation, and to shape for yourselves, as much as possible, your own destinies. The task is hard, but fruitful. The end difficult to attain; but your interests, your duty, your glory . . . all consists in marching towards it. What an honour for you to have discovered where lies the declivity of the age, when we see the men of power hesitating, getting confused, nay, rushing back towards the past, to escape the logic of history! Associated operatives, you are truly the men of the nineteenth centres. tury. Be of good cheer! your children will gather still more largely than yourselves, bear it in mind,

They have paid dear enough for their credulity.

One of your great preoccupations must also be to attract through low prices, the numerous class of poor consumers. I know it well, associations cannot tread on the foot-marks of public vampires, like My Dear Friends,—The possibility of putting into practice the ideas of fraternal association was failures, and who profit by the misfortunes of their failures, and who profit by the misfortunes of their failures, and who profit by the misfortunes of their denied; it was confidently asserted that simple labourers could not have sufficient intellect to manage great enterprises of industry; sufficient zeal, spirit of order and discipline to do without a either, as owners of factories do it, speculate upon slackness of labour and on misery: they cannot, by perlike that philosopher of antiquity in whose presence movement was denied; you have created assoconsequently, under the necessity of selling at a higher price than factory owners, a necessity which exposes them to sell in less quantities. Division had already crept into their Councils. Mr. O'Connor, Harney, Itill, and other influential leaders of the body, seeing the hopelessness of the contest,—fearing the ruin that would ensue,—were for abandoning the strike; the men of Wales who had abandoned their hammer and forge, seeing that the Northern Star was opposed to the movement, again resumed their employment; London and the West of England, where Chartism was still rife, were left destitute of any correct information how to proceed. One by one the delegates were arrested, or forced to fly; wholesale imprisonments became the fate of the poor and the unknown; treachery aided this fearful consummation; the chance of centuries fleeted from their grasp, and another link was added to the chain of despotism.—another scourge placed in the from their grasp, and another link was added to the That I positively deny. "Your husband," you further observe, "on the contrary, obliged it ('the suit') to proceed against him by following the opposite course." That, pardon me, Sir, is not the fact.

Mr. Judge has only, throughout the whole C ancery affair, acted as he was compelled. He did not take the heaven curled it for you." "Indeed," said the maiden "I must differ with you. A TEST OF DEATH.-M. Maniple, a learned Belgian, has lately discovered a simple means of discriminating between real and apparent death. It consists in creating a small burn; if there is life, a blister is always formed, even in the absence of apparent sensibility. If death has already intervened, nothing of the kind occurs. This is certainly a simple and singular discovery.

PRICE THREEPENCE STAMPED. NEW WEEKLY NEWSPAPER. On Saturday, October 6th, will be Published No. I. of the EEKLY TRIBUNE Uniform with the Spectator. DEVOTED TO THE ENERGETIC AND INDEPENDENT ADVOCACY OF

DEMOCRATIC REFORM AND SOCIAL AND MORAL PROGRESS. PROSPECTUS.

The Weckly Tribune is started as the organ of that large and growing class of the people, who, dissatisfied with the existing political and social organisation of society are seeking to effect a radical or permanent change, based on equal justice and association. The leading principles and objects will be found set forth in the following sum-

mary:—
First, then, it is our intention to demand for the people of this country the right of the suffrage, divested of all property conditions and qualifications, basing the right of voting on the manhood of the individual, and not on the quantity and kind of bricks and mortar he may inhabit.

Our positical creed, therefore, will be Universal Suffrage with whatever means and appliances that may be deemed necessary to secure its efficient and independent working, whether it be summed up in the People's Charter, or any better practical mole of developing the will and opinions of the British Democracy.

National and Unsectarian Education we shall demand for

believing it to be a useless and expensive machine, an in-sult to those who do not believe in its dogmas and preten-sions, and a great stumbling-block in the way of civil and religious liberty. Free and equal worship for all, untaxed and untramn elled, shall be our motto on all questions re-lating to the subject of the Church and those who dissent from its creed and formula. At the same time, unlike many whose liberality only extends to their own sect or party, we shall claim for every man the right, whether by speech or writing, freely and unreservedly to maintain his opinions, be they for or against religion as taught and practised, deeming that nothing short of the fullest and fairest discussion can elicit truth or benefit mankind.

I shall now complete the evidence with It was while on a private visit to friends in the West of Scotland that intelligence reached me of the deaths of our martyred bronches.

With your permission, Mr. Editor, I will enlarge a little on these propositions. In the first place, I contend then, that if a community were fairly and interest property whether the circulating medium be five pounds, or ten pounds, or ten pounds, per head. The difference of any would be in favour of the smalter amount, as, in that case, the half-sovereign would be equal to the purchasing power of the sovereign in the other case. In one state of things it would be in favour equive the power of the sovereign in the other power of the sovereign in the other case. In one state of things it would requive the shelf to the buyer; and in the other, it would pass through his hands, and I would pass through his ha trade. In a community, with one half of the circulating medium, the shoemaker would receive five shillings for a pair of shoes, for which, if the money were doubled in quantity, he would receive ten shillings; but as the shoemaker in the former case would be able to purchase his hat, his coat, and every other article he wanted, at half-price, the

seing that this decreased value will also decrease the pressure of taxation in the sause proportion; and whatever is kept from the gripe of the taxater is so much grain to the nation—to the industrious part, at least. So far, I see an adveratege in the house now. (Laughter)—The prisoner: I may abetter, to reduce these taxes at once in a fair, straightforward manner, than effect the same purpose in this roundabout way? It is a well known fact, that all surts of commodities have, on an average, fallen in value one half within the last trenty verry. GAS EXPLOSION AT GREENWICH. - On Monday night an explosion of gas took place at the residence of W. Matthew, Esq., of the firm of Messrs. John Penn and Co., engineers, situated at No. 18, Valentine-place, Blackheath-road. Mr. Matthews was sitting busily engaged with tools and instruments used in engineering, when a strong smell of gas annoyed him. He rose from his seat, and with a lighted paper got on the chair to discover from whence the escape of gas had taken place, and then in an instant a very loud and alarming explosion ensued, driving out the two window sashes into the street, and demolishing upwards of fifty large squares of glass. It is singular to remark that glass was broken in every room in front of the premises. A large leaden jar was blown from the table into the road, and much of the broken glass driven nearly to the opposite house. Mr. Matthews, we are sorry to say, was much burned about his face and hands, and one female servant suffered by being scorched on the neck.

ESCAPE OF A CONVICT FROM HIS GANG AT WOOL-WICH, AND RECAPTURE OF HIM .- On Wednesday, a convict named Henry Connolly, while employed with several other convicts at the saw-pits near the west end of the yard, managed to hide himself and leave his clothes, after substituting a canvass dress, the same as is generally used by the painters and others employed in working with pitch. The convict had been missed before he was absent many minutes, and an alarm given at the gates to be particular as to every person the constables allowed to go out of the yard. Every exertion was made at the same time by the police to find out his hiding place, but he managed to elude them. When the men left work at half-past five o'clock the gates were only partially opened to admit of every one being more minutely examined, as it is now more difficult to know the convicts from labourers since their whiskers have been allowed to be cultivated as they choose. Several of the guards of the con-vict ship were also present to aid in detecting the convict if he should attempt to pass out with the workmen, as the convict Wood must have done. After six o'clock sentries of the Royal Marines were posted outside the dockyard wall, and every precaution taken that the convict should be captured.

Poisoning at Cheltenham.—Sept. 20.—The death of two persons here in a very sudden manner, after eating a dinner of cucumber, bread and cheese, and apple dumpling, has excited an unusual sensation.

At first the parties were supposed to be labouring under an attack of cholera, but subsequent inquiries led to the conviction that they were poisoned—it is supposed by arsenic administered in the apple lumplings. The family, consisting of six persons, had partaken of four cucumbers, the remains of a offensive liquor; but it is proved by the medical attendant that the symptoms under which the deceased and the other parties who partook of the dumplings laboured, were not those of cholera, but stands adjourned to Friday morning. Mrs. Kidd had occasion to return to the lower part of the house in a short time, and it was then that the discovery of the dreadful act was made. She found her husband seated on a chair near the door, strangled. The mode in which the ill-fated man had carried out his dreadful object is so singular, and evinces so great a degree of resolution, not to say ingenuity and calculation, that it deserves particularising. He first fastened one end of a clothes-line to the handle of the door, then drew the rope over the "jamb," contrived a noose, which, upon being placed round the neck, left a knot directly in front of the throat, and having made a slip noose at the extremity, placed his foot in it. HAS FAILED ONCE MORE. It is in vain to attempt lisguise or evasion. A blight as sweeping, rapid, and destructive as that of 1846 is in full progress. In some counties there is not one field untainted. The farmers are digging and selling in a panic. The price of potatoes has fal'en one-half during the last week, and within a few hours journey of Dublin. The disease is still at its height, blighting new districts every day. A correspondent who has driven through Wicklow since Saturday last, assures us that the crop in that entire county already lies a mass of putrefaction in the earth. CORN.

The funeral of this unfortunate victim to classrule, took place on Sunday, the 23d uit., and notwithstanding the extreme wetness of the morning a vast concourse of persons attended from all parts of the metropolis and its environs. At half-past two o'clock the mournful procession started from the rendezvous of the Cripplegate locality, (28, Golden-lane,) for its destination (the Victoria Cemetery,) conducted by Mr. Fowler, as marshalman. The following was the order of procession:-Marshal banner bearers carrying the Finsbury tricoloured flag,-inscribed on either side with the following inscription, taken from the Sun newspaper of the Thursday evening, the 20th of September. - "We cannot term it otherwise than something very near a kin to deliberate assassination"; eight men with wands; a plate glass manufacturers van, which formed a raised dais, on which was placed the coffin containing the remains of Alexander Sharp. The coffin being covered with a pall of scarlet velvet, having a satinette double border of white and green, thus forming the Chartist tri-colour. On either side of the van was inscribed in large black letters, on a white ground-

" He asked for freedom with his breath. Merciless tyrants gave him death. And at the back of the van in similar characters. was the inscription-" No man should be a felon for his political opinions." On either side of the van were men with the batons of office to clear the way. The van was followed by twelve friends of the deceased, bearing the wands of office; immediately behind them was the magnificent flag belonging to the "Emmet brigade" emblazoned with the harp of Erin, and inscribed-" What is life without This was followed by several cabs, bearing the widow, orphans, and other relatives of the deceased; the rear was brought up by a long line of political friends, walking arm in arm, four and six abreast. The route was different from that observed on the occasion of Williams' funeral, on the previous Sunday: leaving Finsbury-square by way of the chapel, through Mile End-gate, down the Dog-row, Bethnal-green, to the Victoria Cemetery. Just as the mournful calvacade was about to start, the rain -which had for hours previously came down unceasingly-ceased, and the weather continued fine during the time occupied by the friends in traversing the whole line of route, which—in consequence of the immense concourse of persons-was rather more than two hours and a-half. The roads-from the extreme wetness of the morning-were standing pools of mud and water, consequently the walking procession was not so long as that which followed the remains of the martyred Williams, the people evidently preferring the broad pavement to the road: nevertheless, the roads, windows, and balconies were lined with sympathising spectators, who eagerly purchased the splendid article re-published from the Sun of the 20th inst., which was offered for sale by numerous vendors. On arriving at Whitechapel, the immense width and length from Aldgate to Mile End-gate, presented a forest of densely crowded human beings. The Dog-row and Bethnal Green-road, were equally crowded. GENERAL AMNESTY. A very numerously attended public meeting was held at the Literary and Scientific Institution, John-street, Tottenham-court-road, on Tuesday evening, September 25th, to memoralise her Ma-

prison authorities? It is true that the doctor of the effort must be national, and must be made at this par-

of, and advice given by the most eminent medical men through the press and otherwise? Have they not one and all declared that the best preventative is generous diet, warm clothing, and moderate exercise? If, therefore, these opinions be correct—and we have every reason to believe that they are—then what can we think of a man who could deliberately say before the jury, "that a sudden change from full diet and plenty of exercise to a damp cell, and bread and water did him no harm?" But the fact is, in my opinion, that he whose loss we now deplore, was sent to his grave prematurely by the interest in the British constitution; and is further of fact is, in my opinion, that he whose loss we now deplore, was sent to his grave prematurely by the treatment he had to undergo in Tothill-fields Prison; a treatment, which in common humanity, ought not to be inflicted upon the most desperate "felon." at a time like the present, when this awful scourge was not only prevalent in the metropolis, but actually raging within the walls of the prison; but how much more atrocious in the case of our departed brother, whose moral character was withdout a stain? He had done nothing beneath the dignity of a man. He saw his country groaning henceth the evils arising from misrule and class-

by an earnest endeavour to amend or repeal the laws relative to sedition. (Hear, hear.) He knew that some said the Whigs would not release the men, but he believed that they liked the reputation for mercy; and the two men having died from cholera, he thought they would have the good sense to make this their excuse, and comply with the prayers of the people. (Cheers.) Mr. O'Connon, on rising, was received with seve-

ral rounds of applause. He said that it gave him

no small pleasure to discover the truth of his old

maxim, that "the folly of the day is the wisdom of

the morrow" from the resolution just proposed. He

entirely agreed in the denunciation of madness contained in that resolution, while he was sorry to think that the Chartists who had departed—and those who were still suffering incarcerationwere the victims of their own credulity and the enthusiasm of madmen. (Cheers.) How often had he told them that moral power mind, which teaches him how to reason, how to endure, and when forbearance becomes crime; and should that fail to achieve for man all those rights and privileges to which he is justly entitled, and should physical force be required-which God forbid-it would come to the aid like an electric be washed, and wear the prison dress. MARK-LANE, Monday, September 24.—We have had large arrivals of wheat, barley, and oats, from abroad since this day se'nnight, and a good show of wheat samples this morning from Essex and Kent. The market for wheat was not so brisk as on Monday last, and the best qualities of new barely supported that day's prices. The demand for foreign wheat was very languid, having but few country buyers, but no material reduction was submitted to for wood qualities. For flour we have had less demand, unless the back of the bill. Then, said 1, "Take it back, and add an 's' to it, make it IGNORAMUS'S, and there never was a truer finding." (Tremendous cheering.) Now that was the definition of the law for the rich; and the reason why free trade agitators were not prosecuted for much more violent speeches than were ever made by Chartists, was because they than were ever made by Chartists, was because they the spirit of the law, and the clemency would be an end to all misgovernment. SMITHFIELD, Monday, Sep. 24.—We had an unusually large time-of-year supply of home fed beasts on offer this morning, viz., upwards of 5,000 head. With very few exceptions this is the largest number on record for the month of September. The general quality of the beasts was by no means first-rate. As might be expected, the beef trado extensive, and of full average quality. The heaviness in the beef trade had considerable influence upon that of mutton, which ruled dull, and pricess suffered a fall of 2d per 8lbs. The best old Downs were quoted at only is per 8lbs. At the close of the market a large number of sheep been brought to a close, we have discontinued to quote that description of stock. We had a full average supply of calves on show. All kinds of veal were heavy, at barely last week's quotations. Neat small porkers were held for rather more money. In other kinds of pigs very little was

Borough, Monday, Sep. 24.—Somewhat more activity is

noticeable in our market than at the date of our last re-port, and the finer descriptions of the new arrivals have been mostly cleared off the market. The duty is called £80,000. Sussex pockets, 126s to 140s; Weald of Kent ditto, 140s to 160s; Mid and East Kent ditto, 150s to 226s. LONDON, Monday, Sep. 24.—The upward movement in the alue of Canary seed continues, and the sales made to-day

ere at enhanced terms. In other sorts of seed there was little passing, and quotations remained nominally uraltered. FRUIT AND VEGETABLES.

SATURDAY, Sep. 22.—Hot-house grapes, peaches, and nectavines are plentiful. Pine-apples have not altered in price since our last account. Filberts and foreign walnuts are abundant. Oranges are scarce. Lemons moderately plentiful. Amongst vegetables, turnips may be obtained at from 3d to 6d a bunch. Carrots the same. Caulidowers are less plentiful. Green peas fetch about 4s per bushel. Potatoes have not altered since our lest received. Much
